PRESCHOOL

Tenacity is the ability to be very determined and persistent, which is essential to children's success in school and in life. Our play based preschool classrooms will introduce our stem program. This program will help them learn activities that will stick with them for the rest of their lives. We will work with every child individually to ensure that they are learning at the proper level. Our state-of-the-art programs are designed to develop children's...

Language and Literacy Skills

SPECIAL EDUCATION PROGRAM

Special means different and a little more attention. From birth we as parents lay down the concert for our children's road to success. We Are The Village will implement a program that will not only help children but their parents as well. Our loving teachers will create bonds with families that will last for years to come. We will offer three different type of therapy services on site...

Developmental Therapy

- Motor skills
- Language skills
- Social-emotional skills

Occupational and Physical Therapy

- Improve children's ability to preform daily living activities
- Improve fine and gross motor skills
- Create independence that helps with self esteem

Speech Therapy

- Language intervention activities
- Oral motor and swallowing activities
- Articulation activities

Our certified ABA specialist will work in small setting classrooms to ensure that our children are receiving the time and attention they need. We understand that every child is not the same and some may need a little extra care so we will provide more teachers, time, and space. Our special education rooms will have low sensory for our children who have sensitivities to light and loud sounds. We are changing the image of daycare, we want families to feel safe knowing that their children are in our care. This will be everyone's second home.
